

NEW CONCEPTS MANAGEMENT SOLUTIONS

Personal Finances **“Managing Money, Wisely”**

“Money is plentiful for those who understand the simple rules that oversee its attainment and use.” Annoymous

Very few schools teach the important skills of managing, spending, saving and investing your money. Unfortunately, too many people make it all the way to adulthood without ever learning basic money management like creating a budget, investing for the future, or how to make credit cards *work* for YOU.

Developing money management skills can help you use the money you have now (and will make later) to live the life you want – AND, if you happen to receive an inheritance from rich Uncle Joe or a large sum of money from another source; you will know how to *handle* it.

Course Objectives

This half-day interactive training event will provide participants a foundation for acquiring money, keeping money and making money earn more money.

Participants will learn the golden rules of personal finances; why having a budget is crucial to successful money management; how to use credit cards without going into debt; the importance of saving - for rainy days, major purchases, vacations, and retirement; and much more.

Who Should Attend

Those who want to understand how to be better stewards of their personal and/or family finances.

Workshop Goals

- Understand the basic concepts involved in money management
- Obtain a working knowledge of interest rates for both borrowing and saving
- Become familiar with credit scores and how they work
